Concerning: Order of Molift special slings

molift[®]

The possibility to order special slings will be discontinued from **1 Oct 2020**

Etac have had the service to produce Special slings during a long period. It is not only a time-consuming and costly process to produce special slings, there are significantly greater regulatory requirements for all documentation / tests that need to be done for each special sling we sell.

We have decided to discontinue this service which has been used by a few customers the last years. Our standard portfolio of slings meets the need for majority of users. If there is a need for another design, it needs to be considered in the R&D projects.
