

Education Event - London

Redefining care through smarter design

Join us in London for a festive, free, hands-on learning experience as inspiring as it is informative. This interactive event is designed especially for prescriber's working with adults and/or children in patient handling, bathroom aids, and paediatric seating.

Guided by our Education team, you will dive into product sessions and "hands-on" problem-solving workshops that incorporate real-life scenarios. Discover how Etac's ergonomic designs can transform everyday challenges making life more comfortable for users and safer, simpler, and more efficient for carers.

Explore how the spaces we work in shape care and comfort and how smart design can enhance both. Explore the ways Etac combines durability and sustainability to improve both patient well-being and everyday care practices.

Throughout the day, our team of experts will be on hand to share insights, answer questions, and spark ideas that you can use in everyday practice.

Date: Wednesday 10th December - 10:00 - 15:00
Venue: Barclays Media Gallery at
Lords Cricket Ground, St John's Wood Road, London, NW8 8QN
Directions: [How to get there](#) & [Lords site map](#)

Product Sessions

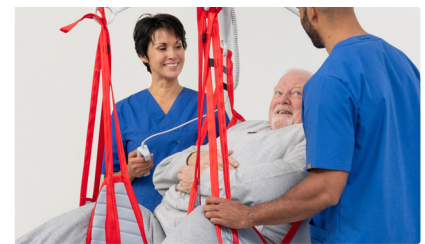

Simplifying in-bed systems

Use Immedia SatinSheet and 4WayGlide in-bed systems in combination with LeanOnMe positioning cushions to demonstrate positioning and turning techniques that promote good working posture and can help reduce anxiety and maximise comfort for users with complex needs.

Hoists and slings - managing function, safety and comfort

Using Molift hoist systems, slings and sling bars to select the correct hoist for the user and their environment. We look at bariatric solutions and the importance of choosing the right sling bar and sling for a particular hoisting activity to maximise support, comfort and safety.

Using F-words in the Bathroom

We look at the 6 F-Words (Function, Family, Fitness, Fun, Friends, Future), to re-frame toileting & bathing as meaningful occupations that evolve from childhood into adulthood. Through case-based examples, we will explore how occupational therapy reasoning can anticipate transitions, protect dignity, and reduce carer strain.

Managing Postural Complexities

Explore postural seating systems for children and adults with postural and pressure care needs. Drawing on clinical insights and practical demonstrations, the session will guide participants on selecting the correct provisions for each individual, optimising comfort, support, and long-term health outcomes.
