Bedside cabinets

Home comfort and support to go with every bed

Bedside cabinets from Stiegmeyer

The perfect combination of functionality, safety and style

The bedside cabinet is probably the most important piece of furniture in a resident's room. It stores personal items and assists with reading and eating. At the same time, it caregivers staff to work more safely and efficiently every day.

A perfect bedside cabinet combines useful functions, safety and style. Meeting these high specifications is a matter of course for all bedside cabinets from Stiegmeyer, which are ideally equipped for the demanding routines of everyday care.

Model overview

06 Aparto

The modular bedside cabinet family

- Numerous feature variants for different requirements
- Innovative overbed table solutions
- Easy to operate to support caregivers

10 Aparto brevo

The low-height bedside cabinet for great flexibility

- Ideal companion for floor level beds
- Full functionality and flexibility at low heights
- Option of height-adjustable and slide-out overbed table

14 Aparto server

The ideal companion

- Also available in brevo height
- Large Aparto-style overbed table top, with intuitive operation
- Extremely stable and easy to clean

16 Combino

The all-rounder

- Modern bedside cabinet with rounded metal corner profiles for a homelike appearance
- Various drawer sizes
- Overbed table attachable on either side

17 Estrado

The versatile bedside cabinet

- Storage room in the body accessible from both sides
- Large top surface
- Tilting overbed table

18 Alcamo

The feelgood bedside cabinet

- Rounded corner profiles in wood decor
- Accessible from both sides
- Gas strut assisted raising of overbed table

19 Conturo

The sturdy bedside cabinet

- Accessible from both sides
- 360° castors facilitate manoeuvring
- Optional refrigerator

20 Lumano

The practical one

- Homelike bedside cabinet with rounded top surface
- Large usable surface and an open compartment
- The slide-out tray almost doubles the usable surface area

21 Pleto

The stylish helper

- Tabletop in 2 variants: one-piece non-tilt, or split with adjustable tilt
- Large height adjustment range
- Steady C frame design to fit under beds

22 Quado

The mobile helper

- Space-saving bedside cabinet with ample storage
- Optimal hygiene properties
- Easy manoeuvrability

Aparto – the modular bedside cabinet family

- Intuitive use
- Ergonomic and well thought-out design
- Homelike, economic and functional
- Hygienic and easy to clean
- Useful accessories

The Aparto family offers a comprehensive selection of bedside cabinets with various arrangements of doors, drawers and open compartments, to meet a wide range of individual requirements.

Available as a stand-alone bedside cabinet or in combination with a height-adjustable overbed table, and as either a standard-height or low-height model, to meet the requirements of modern care with regard to fall prevention.

To complete the Aparto family, two server versions are available, as well as models with an integrated refrigerator. Either with a 20-litre refrigerator drawer always in combination with a height adjustable overbed table, or as a stand-alone 30-litre refrigerator with a door. The servers can be “parked” above any of the stand-alone variants to save space.

Aparto brevo

Aparto

Every cabinet body variant with side edges, regardless of its customised arrangement, can also be combined with the innovative overbed table.

If a larger surface is needed, even without a height-adjustable overbed table, all variants can be configured with a rounded top surface and slide-out table.

Aparto – bedside cabinets redefined

Flexible and future-proof with rotatable body for use on either side of the bed

180°

More room for nursing care with a space-saving and steplessly slide-out overbed table

Less strain on carers thanks to large castors and gaspring assisted height adjustment

Quick and reliable hygiene thanks to effortless removal of the tabletops

More convenience for residents thanks to useful and easily attachable accessories

Promote and maintain independence with the easy-to-operate overbed table

Aparto

The modular bedside cabinet with numerous options

The configuration options of the Aparto family meet individual requirements. Better visual orientation, easy accessibility and secure storage can be combined in one unit. And that's not all – Aparto incorporates design innovations that will convince residents and

carers alike. The intuitive release and innovative design of the overbed table promotes the resident's independence. With its large castors, carers can manoeuvre the bedside cabinet effortlessly.

▲ Once retracted, the overbed table is stowed in a space-saving way.

▲ The Aparto offers ample storage space and a safe surface to put things on. Slightly raised sides prevent items from dropping off unintentionally.

▲ The integrated slide-out tray provides a practical extension to the usable cabinet surface, whenever required.

▲ For people who would like to continue to use the proven Stieglmeyer technology, the Aparto can be ordered with "Somero adapters". This enables the fold-away tilting overbed table of the Somero model to be attached.

▲ Ample room for everyday objects: the stable overbed table offers a place for meals, books and care utensils. Residents and carers have their hands free at all times.

▲ The convenience of a hotel: The clip-on multiple socket strip provides electricity for smartphones, radios and lamps and is easy to remove for cleaning the bedside cabinet.

▲ The Aparto, with its smooth-running castors, can be effortlessly turned on the spot or moved around the room.

▲ The overbed table can be taken off in seconds, without the need for tools, to give it a thorough clean.

ESSENTIALLY BETTER

The slide-out overbed table

The overbed table in our Aparto range can be slide-out horizontally with next to no effort. This has great advantages during the working day:

- One-hand operation makes it easier for carers in hectic situations
- Infinite height adjustment between approx. 80 – 110 cm
- Many residents can operate the overbed table without any help and retain a degree of independence
- Infinitely extension of the table allows to slide it out just to the required degree
- Reliable hygiene due to easy removal for cleaning
- Revolving body permits economical use of the table on both sides of the bed

▲ The Aparto's large, sturdy tabletops can also be used in the daily care routine – for washing bowls or medical devices.

Aparto breve

The low-height bedside cabinet without compromises

Low-height bedside cabinets offer improved safety and independence for residents who use low-height or floor level beds. Stored items are easier to reach and recognise.

With its Aparto breve, the Aparto range also offers a variant with an innovative, easy-to-use overbed table – a unique selling point.

▲ Even with floor level beds, the height-adjustable overbed table offers a convenient surface to store items.

▲ The smooth-running drawers provide safe and secure storage.

▼ With its rounded top surface and its integrated slide-out tray, the Aparto breve provides cosy convenience and comfort at a low height.

ESSENTIALLY BETTER Smart at any height

Its great flexibility allows for particularly economical use of the Aparto breve:

- Usable at any height with its height-adjustable overbed table from about 61 to 81 cm
- Ideal companion for floor level, low-height and standard care beds
- Back-friendly work and storage surface for caregivers
- Its rotating body and easy manoeuvrability ensure its usability in different positions in the room

▲ Residents who are particularly prone to falls and depend on a floor level bed experience many restrictions in their everyday life. With the low-height Aparto breve, they can regain a bit of their quality of life.

▼ Its height-adjustable overbed table also gives the bedside cabinet an ergonomic, back-friendly surface for care staff to place things on.

▼ Residents with physical limitations can always reach personal belongings on the Aparto breve.

Adaptable:

The Aparto product range offers rotatable cabinet body

Enjoy the new flexibility that comes with our Aparto bedside cabinets: Because its body can be rotated, without using tools, each Aparto can be used anywhere – even, for example, if a resident’s health calls for a medically indicated alteration. This lets all care units work economically and benefit from great planning certainty.

▲ The cabinet is rotated in three easy steps.
Step 1: Release the cabinet body lock by pulling it upwards.

▲ **Step 2:** Gently push the cabinet body to the left and forwards following the slotted guide, and rotate it.

▲ **Step 3:** Position the cabinet body as required and engage the cabinet body lock.

New versatility to suit your preferences

Whether you prefer a cosy and compact unit with a rounded top surface and slide-out tray, or a combination that includes the innovative overbed table, every variant offers you a perfectly organised cabinet body that is tailored to your needs.

| Model variants |  |  |  |

Servers of the Aparto range

Innovative companions

The Aparto family of bedside cabinets has grown to include both the Aparto server and the Aparto brevo server. The brevo low-height variant, in particular, is the ideal companion for floor level beds such as our Tereno model. Innovative functions featured by the Aparto family, such as the space-saving slide-in overbed table and the uncomplicated cleaning options, are also featured by the servers.

▶ The easy-to-adjust height of the Aparto family of servers is ideal for taking care of residents in bed.

▼ The mobile server can be wheeled over an Aparto bedside cabinet to save room when not in use.

▲ Aparto brevo server

▲ Aparto server

Building blocks for more comfortable working and living

The Aparto family offers advantages for every user in the nursing home

“Good value for money with a long life, great flexibility and optimal hygiene are important for me.”

Inga Johansson,
nursing home manager

The nursing home manager keeps in mind the well-being of everyone at the nursing home. Our Aparto bedside cabinets meet these requirements:

- Easy and intuitive operation
- Easy to manoeuvre to any place you want
- With its height-adjustable overbed table, the low-height Aparto brevo also supports caregivers

“Our ideal bedside cabinet is easy to operate and can be used everywhere. It supports residents and carers alike.”

Valerie Nowak,
care service manager

The care service manager has to overcome a number of challenges: Staff in the various units have to be motivated and their health maintained. Residents and their relatives want to feel at home. Our Aparto helps with these tasks:

- Attractive procurement costs and flexible use
- Homelike, individual design
- Easy, thorough cleaning for safe hygiene

“The less I need to use a toolbox, the quicker I can adapt our equipment to suit current requirements.”

Mustafa Bilgin,
technician

Facility management fosters smooth and efficient working in the facility. To underpin this aim, beds and bedside cabinets should be safe and easy to maintain, to clean and to adapt to the requirements in residents' rooms. The Aparto range supports these objectives:

- Robust and durable construction
- Tool-free conversion due to rotatable cabinet body
- Support through first-class Stieglmeyer service

“I find many physical activities are hard, but I would still like to live as autonomously as possible.”

Eva Marks,
resident

The room furnishings need to afford a feeling of individuality and security. Our Aparto bedside cabinet is an important element of this:

- Appealing design
- Secure and easily accessible storage room for important personal belongings
- Easy to operate even for residents with limited abilities

Configuration: two drawers at the top and one large drawer at the bottom.

▲ The Combino is available with two different configurations. With an open compartment in the middle, as standard.

▲ The multifunctional rail, fitted as standard, provides plenty of room for accessories.

▲ The table has a foot that allows it to be uncoupled from or coupled to the Combino.

Combino

The all-rounder

Combino combines service functions of a modern bedside cabinet with easy operation. It is characterised by its sturdy stability and a timelessly stylish design. The rounded corner profiles give it a particularly comfy feeling.

Combino is available with or without an overbed table at the side. A compartment or roller-guided drawers in various sizes provide the required storage space, and may be selected and arranged as needed. There is also the option of a built-in refrigerator at the bottom.

The practical details of the Combino add up to greater convenience in every day use. Besides a lockable slide-out table, adapter sleeves for a telephone or intercom system are included. A reading lamp ensures good orientation at night. The multifunctional rail, fitted as standard, offers a place for accessories or can be used as a towel holder.

The overbed table – for flexible use on the Combino

The Combino offers particular comfort with its stable and flexible overbed table. This can be easily attached and detached – on either side. This means that the Combino can be placed on either

the left-hand or right-hand side of the care bed and fits in with any existing furniture and room layout.

▲ The Lumano is available with various decors and handles.

Lumano

The practical one

The Lumano enhances comfort in the daily care routine with its particularly large useful surfaces. It has an integrated slide-out tray under the top surface which almost doubles the available space.

The interior of the Lumano also leaves nothing to be desired: The drawers glide on roller slides and are therefore particularly smooth-running and quiet. A simple release mechanism allows the drawers to be easily removed for thorough cleaning.

The Lumano is available with an optional fold-down overbed table. It has a height-adjustable tabletop that can also be tilted. Changing the table column over from one side of the bedside cabinet to the other is quick and easy – with just one click of the foot pedal and no need to use tools. The fifth castor on the overbed table makes it resistant to tipping.

▲ The slide-out tray is handy for tablets or laptops.

▼ Lumano with Somero adapter and overbed table.

▲ The overbed table of the Estrado is integrated into the cabinet body to save space.

▲ The tilting overbed table can be used as a bookrest.

▲ The top surface of the Estrado cabinet is particularly spacious.

Estrado

The versatile bedside cabinet

The Estrado is a sizeable and comfortable bedside cabinet, but comes with an additional space-saving design feature: in its retracted state, the overbed table is fully integrated into the body of the cabinet. This increases the top surface of the Estrado cabinet, as it

extends across everything and offers a great deal of useful space. The drawer, storage compartment and cupboard can be used from both sides, which makes this cabinet highly flexible in everyday use.

▲ The tabletop and corner profiles of the Alcamo are rounded for a homelike appearance.

▲ The Alcamo can be accessed from both sides.

▲ The height-adjustable overbed table is easy to tilt.

Alcamo

The feelgood bedside cabinet

The Alcamo unites the comfortable versatility of the Estrado with a design that incorporates a homelike touch: Its tabletop and the corner profiles are rounded and create a particularly homelike ambience. The voluminous cupboard, the storage compartment and the drawer of the 89cm high bedside cabinet offer ample

space so that items of everyday use are always within easy reach – from both sides. The overbed table on the Alcamo can be adjusted infinitely and easily to the desired height with the aid of gas strut.

▲ The Conturo's robust overbed table is easy to adjust mechanically.

▲ The overbed table increases the amount of surface available.

Conturo

The sturdy bedside cabinet

Thanks to its robust design and great flexibility, the Conturo is strong enough to easily withstand all the demands of day-to-day care. It also offers residents many extra practical advantages: All drawers and the storage compartment can be used from both sides. If the bedside cabinet needs to be moved from one part of the room to another, its 360° castors make light work of any manoeuvring.

The mechanical height adjustment of the overbed table is also very robust and easy to operate. If the resident wishes to use the overbed table to read at or as a desk, the table can be tilted to provide a comfortable angle at which to do so.

The Conturo can also be fitted at your request with a built-in refrigerator instead of the cupboard unit – this is ideal for keeping refreshments handy on a hot day.

▲ Thanks to its excellent manoeuvrability, the Pleto server is extremely versatile in everyday care situations.

▲ The Pleto server is available with a one-piece horizontal tabletop.

▲ A split tabletop, where the larger section can be tilted, is available as an alternative.

Pleto

The stylish companion

No matter whether the resident is lying down, sitting up or standing up – the Pleto server is always the perfect companion. With its wide adjustment range from 69 to 104 cm, it easily adapts to every requirement.

The server tabletop is available in two variants: As a one-piece horizontal surface it is ideal for meals or for safe storage of items. The split variant allows the larger section of the tabletop to be tilted for use as a comfortable writing desk.

All this can also be enjoyed while the resident is lying down, as its C-shaped frame allows the Pleto server to be positioned right beside the bed or table. If the bed is raised by mistake, there is no risk of injury as a result: this is because the server is height-adjustable even without using the release handle.

▲ The Quado can be effortlessly adjusted to the desired height, between 85 and 115 cm, thanks to its gas spring support.

Quado

The mobile companion

The Quado is a server with many comfort characteristics. Its drawer and the two roomy compartments can be accessed from both sides and offer generous storage space for personal belongings. With its height-adjustable body and the fold-down overbed table in light grey, the server is ideal for taking meals in bed. Its good manoeuvrability and lightweight construction also make it suitable to be used as a trolley to carry medicines or care utensils from room to room. Thanks to its large, smooth surfaces, the server is easy to clean and has excellent hygiene properties.

Quado cabinets can be stored in a space-saving way by fitting them into each other.

▲ The overbed table of the Quado folds down easily and softly.

▲ The chassis ensures excellent stability and is easy to clean.

▲ The optional additional compartment at the side is suitable for storing newspapers and other personal belongings.

Decors

We have a special selection of colours and patterns available to choose from to allow you to personalise the design of a bedside cabinet to suit your taste and adapt it to fit in with existing furnishings. We would be pleased to advise you and plan your furniture with you.

▲ There is plenty of space for documents and newspapers in the document holder.

▲ The holder on the rail can be used for bottles and glasses.

▲ The towel holder on the rail can be positioned as required.

▲ A waste bin can be attached to the multifunctional rail.

▲ An insert is available for the optional lockable drawer to organise items.

▲ The USB clip that snaps onto the rail of the bedside cabinet provides power for personal devices.

Accessories

For everyday added comfort and support

Together with the bed, the bedside cabinet is the most important piece of furniture in a care room. To provide the most individual and flexible solution possible, Stieglmeyer has a large selection of accessories available with many different functions.

A built-in refrigerator is a safe place to store drinks and food on hot days. It can be incorporated easily in many models.

The rail along the top surface of the bedside cabinet is made of aluminium. It can be used to accommodate a practical towel holder or bottle holder. The bottle holder secures bottles and glasses in place on the top surface. The cabinet rail can also be fitted with a snap-on USB clip with an extension cable for plugging it into the electrical socket for quickly charging devices.

A waste bin with a lid and a capacity of around five litres can be simply hooked onto the cabinet's multifunctional rail. The bin is made of plastic and easy to clean.

The document holder provides room for newspapers and books. The variable drawer inserts help to keep everything in order and prevent damage to the drawers. If the resident wants to keep personal valuables in the bedside cabinet, a lockable drawer is available for greater security.

STIEGELMEYERGROUP

Solutions for people who care

The Stieglmeyer Group is Germany's leading manufacturer of medical beds for hospitals, nursing homes and homecare. With modern bedside cabinets, furniture and digital assistance systems, it is also an innovative provider of comprehensive solutions.
