The innovative padded bed for protection against impact injuries

Regia gardo

The bed for optimum all-round protection

Diseases such as Huntington's disease, whose symptoms include uncontrolled movements, expose patients to a higher risk of impact injuries. Their beds are often individually padded, for example with foam pieces cut to size. Burmeier's Regia gardo now offers a contemporary solution that combines safety, comfort and optimum hygiene.

The Regia gardo combines all the strengths of a modern, electrically-adjustable care bed with custom-made padding on the inside. The headboard, footboard and full-length safety sides are equipped slip-on padded covers that are easy to remove for thorough cleaning. The bed has an attractive appearance and is pleasing to the touch, which makes it a place of dignified peace and relaxation.

Strong advantages

- Low-height bed to prevent fall injuries
- Height adjustment range of 26-80 cm allows for back-friendly working with the bed
- Standard full-length safety sides offer additional protection and can be fitted with lateral padded surfaces
- Sitting position and reverse-Trendelenburg position available
- Safe 24-volt drive system
- Easy assembly of the bed and covers
- Suitable mattress always included

The intuitive handset can be used to move the Regia gardo through a height adjustment range of 26 to 80 cm.

▲ The full-length padding offers the resident optimum protection for relaxed rest periods.

▲ In the sitting position, residents can eat, read or use their laptop in bed. The cosy Pleto side table is an ideal companion.

▲ The lateral padding moves with the full-length safety side, which allows the resident to sit on the soft padded cover before getting out of bed at an ergonomic height.

▲ The Regia gardo is delivered as standard with a mattress that adapts flexibly to the adjustment positions of the mattress base.

Functions and details

▲ The covers are fitted closely to the headboard and footboard to avoid creating unhygienic gaps.

▲ Segufix locks keep the ends of lateral covers positioned tightly against the bed frame.

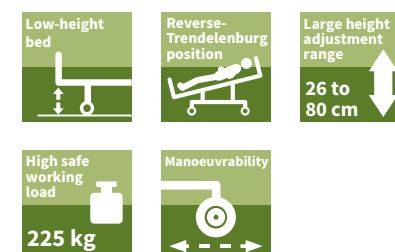

▲ The pieces of padding are easy to remove for thorough cleaning.

▲ This seamless all-round protection cushions residents against impact injuries.

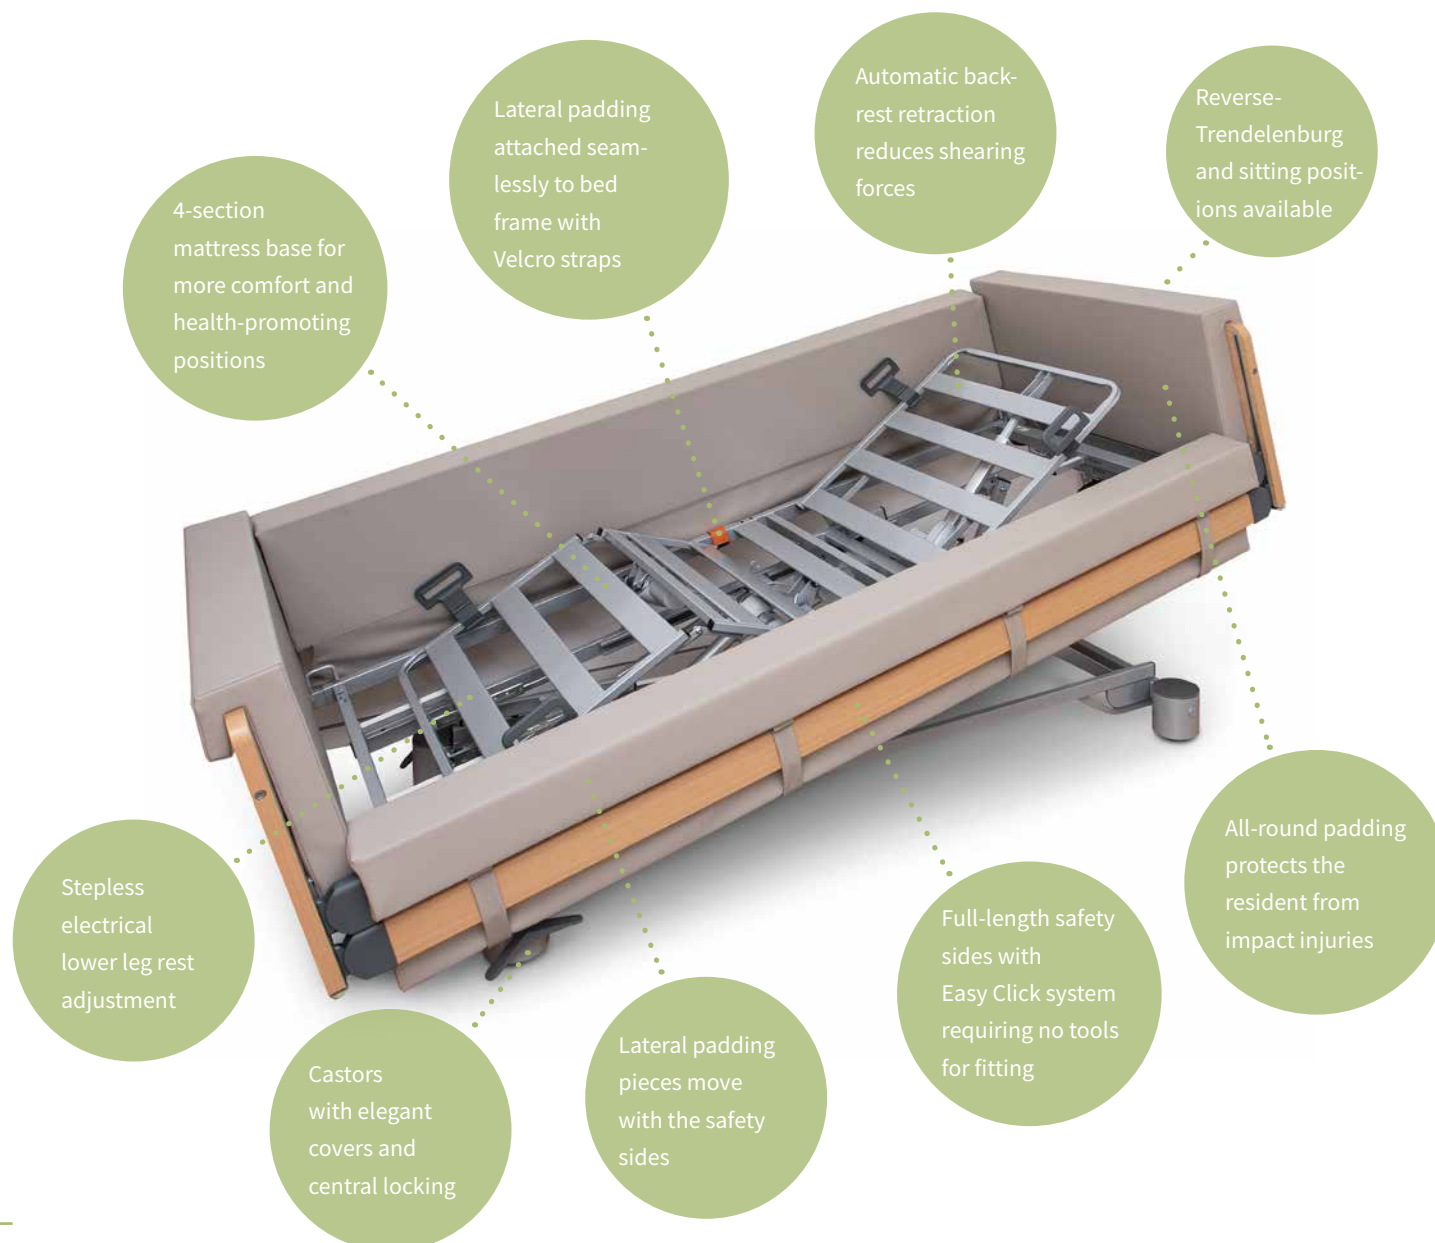

Special features:

▲ The optional wall deflection roller prevents collision damage while moving the bed and adjusting its height.

▲ Convenient Velcro straps ensure that no gaps appear between the lateral covers and the bed frame.

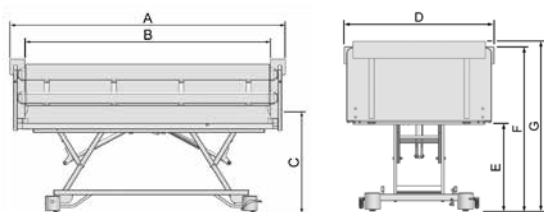

Equipment and options

Features	Regia gardo with standard equipment: 304400
Mattress base 90 × 200 cm	✓
Mattress 90 x 209 x 14 cm	✓
Height adjustment	26 – 80 cm
Safe working load	225 kg
