

# Star Sentinel

powered by Kalogon

# Enable Every day

## Star Sentinel, powered by Kalogon

‘Sentinel’ means – A guard that keeps constant watch and alerts to problems. Whether you are an active or a more complex user, Sentinel provides control and simplicity, enabling you to go about your everyday life.

### Smart and easy-to-use technology

Sentinel’s smart, innovative and easy-to-use technology takes your experience to another level. Vertical air cell cushions can be set up directly from the Sentinel device or using an optional app, removing the need to use a hand pump. Sentinel will then automatically detect when the user is on the cushion and effortlessly maintain the clinically set level of air, giving peace of mind throughout the day, every day.

*Sentinel - enable everyday simplicity and peace of mind.*

### Air management system

Once the clinical pressure level is set, Sentinel continuously monitors the cushion with its air management system, manages the pressure and automatically adjusts the level of air to environmental changes accordingly.

### Alerts

Sentinel continuously monitors and adjusts the vertical air cell cushion throughout the day and will alert you to any issues detected.

### Lightweight and compact

Sentinel’s light weight is similar to a mobile phone and is compact enough to fit neatly into the front pocket of Star cushions.

### Optional app

For those who want control throughout the day, Sentinel comes with an optional app in which you can select settings that work for you.

## Sentinel + StabilAir – The perfect combination

Sentinel and StabilAir make the perfect combination for a ‘go anywhere’ wheelchair seating cushion.

Together, they create a stable cushion solution that automatically adjusts to changes in environment or altitude.

Product name	Item no.	Dimensions LxBxD	Weight
Sentinel, powered by Kalogon - EU unit	KA0501-ST-EU	114x55x37 mm	0,2 kg
<b>Technical</b> <b>Battery:</b> Lithium Ion 1,000 mAh <b>Charge time:</b> 3 - 4 hours <b>Battery Life:</b> 24 - 56 continuous hour <b>Water resistance:</b> IPX4 <b>App pairing method:</b> Bluetooth <b>User Weight Limit:</b> See cushion user manual. <b>Compatible with</b> single chamber air cushions, e.g., Star Standard Air and StabilAir.			
<b>Leaks Detection:</b> Sentinel can detect most perforating cushion damage up to 3mm in size. However, where micro-perforations leak very slowly due to the nature of neoprene to create a seal, Sentinel may not alert the user to a possible leak but will compensate for any loss of air.			

Etac is a world-leading developer of innovative assistive devices and patient handling equipment. Since 1973, we have been committed to improving quality of life for the individual, family members and caregivers.
