Mobile Equipment

Mobility means flexibility! Mobile workshop equipment plays a key role in efficient production processes, supporting the reduction of setup and transfer times and perfecting the retrieval and supply of tools and materials. The approach of taking the workplace to the workpiece instead of the other way round offers many fascinating opportunities for process design. In implementing these aspects, bott applies the principles of universality and consistency throughout the entire business.

cubio workshop equipment and Perfo[®] products form the basis for all our mobile elements. Standardised accessories and a familiar application promote productivity, while stringent design enhances the overall ambience. In this way, mobile elements fit seamlessly into bott's holistic equipment philosophy.

Mobile Drawer Cabinets and Mobile System Cupboards

You will find mobile drawer cabinets in the Drawer Cabinets section on pages 34 – 177.

Swivel castor sets will be found on page 281.
